

Step in the Right Direction

SpeedGuard™ benefits Bar and Restaurant Employees. This translates into a safer and happier work environment with less fatigued Employees and more satisfied Customers, greater sales for any Bar or Restaurant Business with less Workman's Compensation claims.

SpeedGuard™ is positioned to help the Small Business Owners and Large Business Owners alike to improve Employee's work environments as the new OSHA regulations are to be enforced.

The Occupational Safety and Health Administration's (OSHA) new regulation, which went into effect January of 2001 require employers to establish programs to reduce injuries caused by repetitive motion tasks, "awkward positions," or other work activities that could strain muscles, joints or ligaments.
[Patterson's California Beverage Journal, April 2001]

Patented SpeedGuard™ Products
fit every application

- SpeedGuard™ is designed to guard against injuries and to provide added comfort and optimum ergonomics
- Women talk about the permanent lines and bruises due to the leaning into the Rails of Speed Racks
- Men share their scars from stitches to broken knee caps and drainage of the knee operations, due to Speed Rack Rails
- Management enjoys adding a beneficial improvement in the workplace for employees and the reduction of Workmen's Compensation Claims

"Ingenious invention, I told our entire management staff to purchase your products. Our employees are very thankful for SpeedGuard." *Dave* *Dist. Manager @ Bubba Gump Shrimp Co Rest.*

"With back and hamstring problems, the support received with SpeedGuard in place helps eliminate our Bartenders pain when leaning into and over the Bar." *Tim* *President @ Plumpjack Restaurant Group*

"All my Bartenders just love SpeedGuard; we can't believe we worked this long without them. Great invention!" *Brandon* *Bar Manager @ Bahama Breeze Restaurants*

SpeedGuard is a Low Cost Pro-Active Approach

- What Bartenders use for Protection against "awkward positions" by leaning into Speed Racks behind the Bar
- With the increasing amount of liquor bottles being placed behind the Bar, Speed Racks are being doubled up and increased in large numbers
- Bartenders are feeling the pain of needed extra space. Resulting in discomfort and leading to injuries
